Innovation Show

An artichoke pâté, pear marmalade with Pedro Ximenez and black truffle or wasabi EVOO! Bee pollen, orange blossom honey with gold, an authentic honeycomb, octopus "polbo", mojito popcorn, figs stuffed with foie gras, smoked and salted products with saffron, orange, pink peppercorn or old style mustard and original, edible straws, are some of the 1,200 innovations that will be on display at the [24th New Product Exhibition](#) of the [31st Salón de Gourmets](#).

A place where avant-guard, innovation and originality are the basic ingredients shared by all of the foods and beverages exhibited, evolving each year to satisfy consumer preferences.

For this edition, exotic flavours, unheard of combinations across several culinary cultures, mixtures of suggestive textures, fusions of sweet, hot and salty, and unique formats, are presented as novelties for the purpose of transforming gastronomy into a singular experience.

This trends showcase displays only quality, innovative and exclusive foods and beverages that have been marketed between April 2016 and March 2017.

The new vintage years; one-of-a-kind spirits like gin with hibiscus, strawberry or blackberry flavours; blackcurrant, blueberry or cherry vodka; liquor of cookies and cream, figs, acorns or tropical fruits; beers with thyme, black truffle, mead, or the world's first beer made with Iberian ham, are some of the products that will set next year's gastronomical trends and that are only found at the 31st Salón de Gourmets, April 24-27 at IFEMA.
